Re: Annual Road Project Schedule
Cc: Verizon, CMP, Portland Water District, Time Warner Cable, Maine Central Railroad, Maine Department of Transportation, Unitil, Summit Natural Gas

The Town of Cumberland has funded road improvements per the schedule below. The Paving will begin in July 2015. Please inform our office if you have any planned or scheduled work in these areas after June 15, 2015. There will be a 5 year moratorium on pavement cuts or excavations on the roads listed below. Any work after the final paving will result in pavement repairs consistent with State Statute, MRSA Title 23 3351-A:

"If a municipality issues a permit to open a street within 5 years after that street or highway was paved or substantially repaired, the municipality may require the permittee to relay the full width of the road surface on both sides of the cut for a distance of 20 feet from the furthest outside edges of the cut. If that repair overlaps the edge of a repair from a previous opening, the municipality may require the permittee to relay the full width of the road to the furthest edge of that previous repair. The municipality may prescribe the depth and method of restoring the pavement based upon the class of the street, except that in no case may the depth of the restored pavement be less than 1 ½ inches."

Listed below are the streets scheduled for paving.
