

Everyone plays a part in our sustainable future.

CUMBERLAND'S CLIMATE ACTION PLAN

Be Part of the Solution.

HEAT

Get a Heat Pump!

Join tens of thousands of Mainers - and hundreds of our Cumberland neighbors - to install a heat pump in your home or business. Heat pumps offer highly efficient heating, air conditioning, and dehumidification and can save hundreds on your utility bills while keeping you comfortable all year.

RIDE

Consider Green Commuting

Transportation accounts for 37% of our emissions - so we have a big opportunity to reduce emissions by changing the way we get around! Aim to carpool, walk, or bike for in-town errands and if you can, make the switch to an electric vehicle (EV)!

GROW

Try Sustainable Landscaping

What we do in our yards doesn't just stay in our yards. Minimize polluted runoff by avoiding pesticides, installing a rain barrel, and learning about 'green infrastructure'! Support wildlife by choosing native plants and consider transforming your space into a low-maintenance landscape over labor-intensive turf grass.
