

Cumberland Residents,

A poster has been designed and installed in the woods between trail marker 1 and trail marker 2. Attached is an excel and pdf version of the poster.

The poster defines the Buckthorn Pull Area and such items as the Objective and How to Pull and how area is now tagged with yellow markers. HOPE YOU ALL CAN VISIT THE AREA

I plan to leave one of my weed wrenches in the area [and anyone in Cumberland is always welcome to borrow one of my wrenches for any project they want to use it for].

I will also cut some logs in this Pull Area for the brush piles that will be bunny friendly.

Others will need to push this project further any volunteers???.. as I am returning to work on the return trail effort.

If this all looks good to everyone....another good Pull Area is in the Northwest area next to the ball fields. These Pull Efforts are just a great thing to permanently remove the Buckthorn and Honeysuckle.....but only work where Buckthorn is just starting to appear.

Regards,

Brad Hilton
