

PROJECT **PULL BUCKTHORN -- NORTHEAST FOREST AREA**

OBJECTIVE: Pull the smaller BUCKTHORN bushes [and all HONEYSUCKLE] now in this area to permanently remove Buckthorn / Honeysuckle from area

- HOW TO PULL:
- 1) for up to 1/4" diameter stems, pull by hand while wearing gloves.
 - 2) for 1/4" to 3/4" diameter stems, pull with "Weed Wrench".
 - 3) for over about 3/4" stems will be cut by others..... too big to pull, and these cut stems will likely resprout at some future date.

BRUSH [PULLED STEMS] to be piled in designated spots on top of larger stacked logs to give bunnies a place to hide and watch the Buckthorn pulling activities.

KEY TO KILL BUCKTHORN ROOTS BY AIR DRYING TO PERMANENTLY KILL BUCKTHORN
