

Draft Route 100 Roundabout

The map shows the area around the proposed roundabout. Sidewalks would be extended from the roundabout to neighborhoods in all directions. Drag the map to see extent of sidewalks (pink lines).

The photosimulations below show examples of what the area could look like with the installation of the roundabout and economic development in the area around the intersection.

(The image on the left is the existing conditions, image on the right is a photosimulation of new development and installation of the roundabout. Slide the arrows on the photo to switch back and forth between existing and proposed conditions.)

Birds Eye view of Proposed Roundabout (looking South on Gray Rd)

Gray Road (looking south through roundabout)

Gray Road looking south (south of the roundabout)

The center island of the roundabout provides the opportunity for a community gateway feature. Below are a few examples of how these central spaces can be designed.

Below are images of various roundabout designs.

Consider materials for curbs, sidewalks, and plantings.

Do you want a
sculpture or some
other dominant
feature in the center?

This is a long term visioning project. As the town begins to think about opportunities and constraints, we would like to hear your thoughts and opinions.
